

HTML Fundamentals – Practice Task

BASED ON BRO CODE HTML BEGINNERS TUTORIAL

Goal: Create a single page titled `index.html` that matches the expected browser output below. Use only standard HTML elements learned in the video.

EXPECTED BROWSER OUTPUT

Tab Title: My First HTML Page | index.html

Web Development Basics

Module 1: Document Structure

HTML is the standard markup language for Web pages.
With HTML you can create your own Website.

Code Snippet Preview

Here is a preformatted text block preserving exact spaces and line breaks:

Line 1: Hello World! Line 2: Indented text Line 3: End of snippet
