

Code Evaluation Report

Topic: HTML Hyperlinks Tutorial Practice

Date: October 2026

Status: Evaluated

Overall Assessment

Good structure and syntax, with minor email formatting error.

85%

Grade B+

CRITERIA EVALUATION

REQUIREMENT	STATUS	DETAILS & OBSERVATIONS
Absolute Links	PASS	External links to Google and YouTube correctly formed with complete URLs.
Title Attribute	PASS	Hover tooltip titles correctly specified on absolute links.
Relative Links	PASS	Linked local directory paths (assets/aboutme.html, etc.) correctly.
Target Attribute	PARTIAL	Used target="_blank" on relative links instead of absolute links. Syntactically valid.
Mailto Protocol	FAIL	support.mail.com is missing the @ character required for email addresses.

Key Improvement Areas:

1.

Email Address Format:

Change href="mailto:support.mail.com" to href="mailto:support@mail.com".

2.

Target Attribute Best Practice:

Usually, target="_blank" is applied to external links (Google, YouTube) so users don't navigate away from your page, while internal links open in the same tab.

CORRECTED SOLUTION REFERENCE

```
<!DOCTYPE html> <html> <head> <title>My Portal Page</title> </head> <body> <h1>Developer
```
